DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. The following statement of reasons for allowance is in response to a request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission IDS filed on 02/04/10 has been entered.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Attorney Jerome De Luca on 10/21/09. During the interview the Attorney agreed to change the dependency of claim 5 to claim 2 and the cancellation of claims 48-50 and 116-125.

Notice to Applicant

3. This communication is in response to the Pre-Appeal Brief filed on 9/02/09 and the IDS filed on 02/04/10. Claims 1, 4, 48-50, 51-115 and 116-125 have been cancelled. Claims 2, 3 and 5-47 are pending.

4. A Pre-Appeal conference has been held on 10/13/09 and decided that the previous Office Action to be withdrawn, therefore a New Office Action is hereby presenting.

Allowable Subject Matter

5. Claims 2-3 and 5-47 are allowed. The following is an examiner's statement of reasons for allowance.

Independent claim 2 is directed to a method comprising storing information regarding a first medicine; wirelessly communicating a signal between a first container adapted to store the first medicine and a second container, the second container adapted to store a second medicine, the signal including an indication of a number of times that the second container is beyond a range in which the first container is able to communicate with the second container; and generating at least one code based at least in part on the signal, the at least one code indicating whether at least one party has complied with a schedule for taking the first medicine and the second medicine.

The closest prior art of record: Reber et al. (5,950,632) discloses medical communication apparatus, system and method.

de la Huerga (6,529,446) discloses interactive medication container.
Yarin (6,294,999) discloses systems and methods for monitoring patient compliance with medication regimens.

However, the combination of Reber, de la Huerga and Yarin fails to teach or suggest "a method comprising: storing information regarding a first medicine; wirelessly communicating a signal between a first container adapted to store the first medicine and a second container, the second container adapted to store a second medicine, the signal including an indication of a number of times that the second container is beyond a range in which the first container is able to communicate with the second container; and generating at least one code based at least in part on the signal, the at least one code indicating whether at least one party has complied with a schedule for taking the first medicine and the second medicine", as recited in claim 1 above.

Claims 3 and 5-47 incorporate the features of claim 2 through its dependency, and are also allowed for the same reasons given above.

The drawings filed on 6/30/00 have been acknowledged and considered by the Examiner.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on

Statement of Reasons for Allowance."
